BANGALORE • www.linkedin.com/in/manoj-k-8883b4381 • moogle.2416@gmail.com

Final-year BCA student with a strong interest in cybersecurity role, web technologies, and cloud role. Skilled in Python, Java, HTML, CSS, JavaScript, and MySQL. Eager to apply technical knowledge and problem-solving skills in an entry-level IT role while continuing to learn and grow professionally.

Projects

JAN-2026– PRESENT

UIDAI | DATA HACKTHON 2026 | Aadhaar Biometric Update Data Analytics Project

This project presents a policy intelligence dashboard and decision support tool built on Aadhaar biometric update data to support data-driven governance and service optimization.

This analysis identifies regional demand hotspots, age-based update patterns, and inter-state inequalities, enabling policymakers to make informed decisions on Aadhaar infrastructure planning.

APRIL- 2026

HACKTHON | DAYANANDA SAGAR COLLEGE | FINANCE MANAGEMENT

Problem Statement

Decision Fatigue in Family Finance

Households often fail financially not because they earn less, but because:

- Expenses are scattered across apps
- Subscriptions go unnoticed
- Shared expenses become confusing
- Savings goals lose consistency
- Decisions become overwhelming

Most families lack a single intelligent platform that simplifies financial decisions.
